# Basic Offshore Training for Air Crews

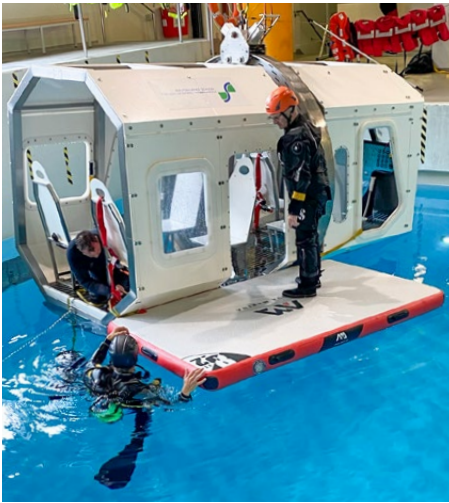

DEUTSCHE  
**WINDGUARD**

# KNOWLEDGE IS YOUR STRONGEST INSURANCE

As a pilot, co-pilot or crew member, you typically receive safety training according to current standards. Beyond that, prepare yourself for an emergency situation over sea or inland waters. We have enhanced our proven portfolio of offshore and under water escape courses to offer both helicopter and fixed wing aircraft crews the best possible training.

## AT YOUR SERVICE:

- State-of-the-art training centre with realistic training conditions
- 10 years of experience in conducting onshore and offshore safety trainings
- Water pool with wave, wind and rain generators for simulating various wave types, wind forces, light and weather conditions
- Slewing crane with rotatable aircraft cabin element for escape training
- Individual customisation of training content and equipment to simulate realistic conditions for your helicopter or aircraft type

## BASIC OFFSHORE TRAINING CONTENT:

- Practical exercises for aircraft emergency egress above and under water
- Utilisation of on-board safety equipment – e. g. flight suits, compressed air emergency breathing system (CAEBS), life jackets, life rafts, etc.
- Survival on sea
- Rescue procedure with helicopter sling

## OUR EXPERTISE IS YOUR YOUR BENEFIT:

- Development of emergency evacuation procedure for your aircraft
- Individual modification of our escape simulator to reflect actual conditions on board your aircraft – e. g. high or low wings, different window and door types, on-board safety equipment, etc.
- Realistic training conditions
- Guidance by experienced trainers

Satisfied customers are our best reference: Robin Wenger and Matthias Niederhäuser, Diamond Earthrounding
